

Location	Due Date (TMDL)	Due Date (Implement. Plan)	Contaminants addressed	Comments
TMDL and Implementation work in the Sandusky River Watershed				
Sandusky Upper	TMDL Approved 9/29/2004		Phosphorus, bacteria, sediment	
Sandusky Lower	TMDL Approved 8/11/2014	Final draft in progress (2016)	Nutrients (TP and N+N), turbidity (TSS) bacteria (E. coli)	
TMDL and Implementation work underway in the Maumee River Watershed				
Maumee Upper TMDL	June 2017	N/A	Nitrates, nutrients, E. coli	Assessment completed in 2015.
Maumee Upper Implementation Plan	N/A	TBD	Nutrients (P/nitrate), sediments, unionized ammonia, total toxics	
Tiffin River TMDL	February 2018	October 2018	TBD	Tiffin to be linked with St. Joseph. Assessment completed in 2013.
St. Joseph River Watershed TMDL	September 2018	N/A	Bacteria, nutrients, sediment	No separate implementation plan. Assessment completed in 2013.
Auglaize River (lower)	N/A	N/A		Assessment completed in 2014.
St. Mary's River	N/A	N/A		Assessment completed in 2015.
Approved TMDLs in the Maumee River Watershed				
2004 – Upper Auglaize River TMDL	TMDL Approved 9/23/2004			
2009 – Blanchard River TMDL	TMDL Approved 7/2/2009		Bacteria, nutrients, sediment	
2009 – Powell Creek TMDL	TMDL Approved 6/18/2009		Nutrients, sediment	Focused 319 program priority.
2010 – Swan Creek TMDL	TMDL Approved 1/6/2010		Bacteria, nutrients, sediment	Re-Assessment started in 2017.
2012 - Maumee Lower TMDL	TMDL Approved 9/25/2012		Nutrients (TP and N+N), ammonia, TSS, E. coli	
Approved TMDLs in Portage River Watershed (adjacent to Maumee River)				
2006 – Toussaint River TMDL	TMDL Approved 9/22/2006		Nutrients (sediment and habitat)	Re-Assessment started in 2017.
2011 – Portage River TMDL	TMDL Approved 9/30/2011		Bacteria, nutrients, sediment
